

# Are Cell Phones Dangerous?

We live in times where we just can't do without our mobile phones and Smartphones as they have become our lifelines. But the problem with that is we have to deal with the impact their radiations can have on our health and wellbeing.

## What medical experts & news are saying about cell phone radiation...

Trending Studies on Harmful Effects of Cell phone Radiation Over the past two years, the number of documented cases of breast cancer, brain tumors, dementia and memory loss linked to cell phone radiation from authoritative sources has increased dramatically. The World Health Organization classified cell phone radiation in the same category as lead and mercury.

The potential harm from microwave radiation (MWR) given off by wireless devices, particularly for children and unborn babies, is the highlight of a new review.

Although the data are conflicting, links between MWR and cancer have been observed.

The review, by L. Lloyd Morgan, senior science fellow at Environmental Health Trust, and colleagues, was published online July 15 in the *Journal of Microscopy and Ultrastructure*.

## Cell phone use in pregnancy may cause behavioral disorders in offspring

By Karen N. Peart | March 15, 2012

Exposure to radiation from cell phones during pregnancy affects the brain development of offspring, potentially leading to hyperactivity, Yale School of Medicine researchers have determined.

The results, based on studies in mice, are published in the March 15 issue of *Scientific Reports*, a Nature publication.

"This is the first experimental evidence that fetal exposure to radiofrequency radiation from

S.A.R. stands for - "Specific Absorption Rate" ... There is only one legitimate method of measuring cell phone radiation recognized by every major health authority and government in the world as well as by the cell phone industry itself, referred to as "SAR". SAR testing measures the "Specific Absorption Rate" of radiation at multiple depths and locations on the head and body in order to quantify how much radiation is actually penetrating it with and without certain safety devices.
